Research interests

I am a cosmologist working at the interface between instrumentation and data analysis. I work on the search for primordial B-modes in CMB polarisation, a smoking gun for cosmic inflation. I focus on mitigating instrumental and astrophysical biases, from instrument design to analysis. I have 6+ years of experience in CMB experiments, on both hardware and analysis aspects.

Education & Academic appointments

Current position

Center for Astrophysics | Harvard & Smithsonian **2020 – present**
Harvard Postdoctoral Fellow in the CMB group

Education

Université Paris Cité **2017 – 2020**
PhD in Cosmology
Dissertation: *Searching for cosmological B-modes in the presence of astrophysical contaminants and instrumental effects*, with Radek Stompor and Josquin Errard at AstroParticle and Cosmology laboratory

ISAE-Supaéro & Université Paul Sabatier **2016 – 2017**
M.S. – Double degree in Astrophysics and Aerospace Engineering
Master thesis: *Novel readout electronics for CMB experiments*, with Matt Dobbs at McGill University

École polytechnique **2013 – 2016**
B.S. in Physics & M.S. in Astrophysics
Senior thesis: *Looking for SZ effect in ALMA data*, with Paola Andreani at European Southern Observatory

Lycée Henri IV **2011 – 2013**
B.S. (years 1 & 2) – Mathematics, Physics & Chemistry
Two-year preparation for national competitive entrance exams to French top engineering schools

Professional service

Collaboration membership

CMB-S4 **2021 – present**
Science Council member as Low-ell BB working group co-coordinator (since 2023)
Member of Small Aperture Telescopes (SATs) and Systematics working groups

BICEP/Keck **2020 – present**
Calibration & Systematics lead

POLARBEAR/Simons Array, Simons Observatory **2017 – 2020**
Low-ell BB and Systematics working groups

Community service

CfA Early Career Astronomers **2023 – present**
Bi-weekly workshops targeted towards early career scientists

Harvard CMB group meeting **2021 – present**
Weekly meetings with local and invited speakers

La Sphinx **2017 – present**
École polytechnique alumni group with a focus on social and environmental issues

Université Paris Cité – Physics Department Board **2018 – 2020**
Student elected representative

APC Laboratory – Cosmology Journal Club **2018 – 2020**

Conference organisation

Parity Violation from Home **October 2023**
SOC & General organisation

Mentoring, Teaching & Outreach

Mentoring

- Kane Sjoberg, junior thesis student (Harvard University), 2023
- Annie Polish, graduate student (Harvard University), 2022 – present
- Brodi Elwood, PhD candidate (Harvard University), 2022 – present
- Christos Giannakopoulos, PhD candidate (University of Cincinnati), 2021 – present
- James Cornelison, PhD candidate (Harvard University), 2020 – 2023 → Maria Goeppert Mayer Fellow at Argonne National Lab
- Will Golay, REU student (University of Iowa, 2022) → astronomy graduate student at Harvard University (2023)
- Maroua Benhatchi, junior thesis student (Université Paris Cité, 2019) → master student in nuclear physics at Université Paris Cité

Teaching

- Qualification for holding entry-level professor positions in France, issued by the French Ministry of Higher Education and Research, based on teaching record and teaching statement (*Qualification aux fonctions de Maître de Conférence*). Issued 2021
- Education volunteer for high-school students & young adults from underprivileged background, 2015 – present
- Physics for pre-med students, Computer Science 101 – Université Paris Cité, 2019

Outreach

- CMB-S4 Saturday Space Science Series, 2022 - present
- Skype a Scientist, 2022 - present
- Astronomy & Physics expert for *Fête le Savoir!* (science outreach for all), 2017 – present
- Camp counsellor for *Universciel* (astronomy outreach for children), 2018 – 2020
- Board member of *SpaceUp France*, 2016 – 2018

- Building a portable cloud chamber for science fairs, École polytechnique, 2014 – 2015

Complete list appended

Talks & Seminars

Seminars

- *Cosmology with BICEP/Keck: From inflation to cosmic birefringence* – AstroParticle and Cosmology Laboratory (APC), December 2023
- *A window on the Universe with the next generation of millimeter-wave telescopes* – UCR Physics Seminar, University of California Riverside, March 2023
- *A new era for cosmology with current and next-generation CMB experiments* – Submillimeter Array (SMA) Science Seminar, March 2023
- *A window on the Universe with the next generation of millimeter-wave telescopes* – LBNL Physics Division Research Progress Meeting, Lawrence Berkeley National Laboratory, February 2023
- *Beam calibration and systematics: from BICEP/Keck to future CMB experiments* – Kavli IPMU, July 2022
- *Updated Constraints on Primordial Gravitational Waves using Planck, WMAP, and BICEP/Keck Observations through the 2018 Observing Season* – CfA Seminar, April 2022
- *Probing Universe's first light: Looking for inflation with the new generation of CMB polarisation experiments* – ESO Lunch Talk, June 2020

Invited talks

- *Beam Systematics in BICEP/Keck* – Beam Mode workshop, Stockholm University, September 2023
- *Cosmology Talks Mini-workshop on parity violation* – Guest expert, online, November 2022
- *New Constraints on Primordial Gravitational Waves using Planck, WMAP, and BICEP/Keck Observations through the 2018 Observing Season* – CMB France Workshop, November 2021
- *Impact of instrumental systematic effects on component separation and large scale B-modes measurements* – CMB Calibration and systematics focus workshop, Kavli IPMU, December 2020
- *A framework for performance forecasting of the parametric component separation in the presence of systematic effects* – LiteBIRD France Day, June 2020

Contributed talks

- *Constraining isotropic polarisation rotation with BICEP3*, CMB-S4 Collaboration Meeting, July 2023
- *Beam calibration campaign requirements to control temperature-to-polarisation leakage for CMB-S4* – From Planck to the future of the CMB, INFN Ferrara, May 2022
- *A framework for performance forecasting of the parametric component separation in the presence of systematic effects* – B-modes from Space workshop, MPA, December 2019
- *Instrumental systematic effects for the new generation of CMB polarisation experiments* – Young French Physicists annual meeting, organised by the French Physics Society (SFP), November 2018

Posters

- *New Algorithms for Characterizing the Beams of Next-Generation CMB Experiments* (with Will Golay) – AAS Winter Meeting, January 2023
- *Control of beam systematics and temperature-to-polarisation leakage: From BICEP/Keck demonstrated performance to forecasts for CMB-S4* – Rencontres de Moriond, January 2022
- *Latest results, current data-analysis and upcoming upgrades of the POLARBEAR experiment* – CosmoGold IAP 2019 : The golden age of cosmology from Planck to Euclid, June 2019
